

On **Saturday 16th March, Imperial Invention Rooms** will be hosting a **FREE** family festival about materials and molecules at The Invention Rooms.

Families will be able to try nano-rainbow chocolate, see the world under a microscope, make a super circuit and glowing artwork. They'll also meet real researchers from Imperial and discover the amazing world of molecular science. They will be running two drop in sessions, **one from 10am-12pm and another from 2pm-4pm.**

Families can either book through Eventbrite or they can contact us directly at: [whitecity.familyprogramme@imperial.ac.uk](mailto:whitecity.familyprogramme@imperial.ac.uk).
